

RIC FAASTeam presents:

## **3 Strikes - You are Out!**

In this seminar, we will discuss weather avoidance. We will review past accident reports where pilot decisions on a VFR (Visual Flight Rules) flight put the aircraft into IMC (Instrument Meteorological Conditions). When weather is beyond the capability of the plane and pilot, loss of control can occur. After attending this seminar, you will understand how these three topics link together, and what the pilot can do to avoid 3 strikes - you are out!

**Directions:** From US 29 (Seminole Trail), take Airport Road toward Charlottesville-Albemarle Airport. At the roundabout, take the second exit onto Bowen Loop. Park in the Short Term or Long Term parking lot and bring your parking ticket to the meeting for validation. As you pass the airport terminal entrance, walk on the sidewalk toward the Control Tower until you get to the pedestrian gate. The seminar will take place in the training room located at the base of the Control Tower. Once at the Control Tower pedestrian gate, wait for an escorted entry to the first floor training room. "Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines."

### **A message from the National FAASTeam Manager**
